

Days	Topics	Tasks
Day 1–2	Section A: English + Reasoning	Vocabulary, synonyms/antonyms, grammar rules, reading comprehension + puzzles, series, blood relations, directions
Day 3–4	Quantitative Aptitude	Percentages, ratios, time & work, SI/CI, profit & loss, number systems, averages
Day 5	Computer Fundamentals	Basics of OS, input/output, memory, file systems, intro to programming concepts
Day 6–7	Programming Basics + C Language (Section B starts)	Data types, loops, arrays, strings, functions, pointers
Day 8–9	Data Structures	Stacks, queues, linked lists, trees, sorting & searching
Day 10	OOP in C++	Classes, objects, inheritance, polymorphism, encapsulation
Day 11	Operating Systems	Process, threads, scheduling, memory management, deadlocks
Day 12	Networking	OSI/TCP IP models, IP addressing, protocols (HTTP, FTP, DNS), basics of LAN/WAN
Day 13	Big Data & AI Basics	Hadoop, MapReduce, ML basics, supervised vs unsupervised learning
Day 14–16	Practice Previous Year Papers + Mock Tests	Focus on weak areas, simulate real exam timing
Day 17	Revise Section A	Practice more reasoning/quantitative + revise concepts
Day 18	Revise C, DS, OOP	Quick recap of syntax + common programs
Day 19	Revise OS, Networking, Big Data	Go through summaries & key points
Day 20	Final Mock Test + Chill	One full-length test + light revision only
